

Something of the Day
Installation and User Guide

App Installation and Permissions

Install the App

- Go to the AppExchange: Something of the Day
- Click **Get It Now**
- Choose **Install in Production** or **Sandbox**
- Accept terms and choose **Install for All Users**
- Click **Done** after successful installation

Verify Installation

- In Salesforce Setup, search for **Installed Packages**
- Ensure **Something of the Day** is listed
- Use the **App Launcher** to find the app

Assign Permissions

- Go to **Setup > Permission Sets**
- Open **Of the Day Admin**
- Click **Manage Assignments > Add Assignment**
- Select the user(s) who will manage the app
- Click **Assign**

Create Your “Somethings”

Each “Something” is a record with:

- Type: Quote, Fact, etc.
- Category: Motivational, Scientific, etc.
- Text: The quote or fact
- Author: Optional (defaults to “Unknown” if blank)

There are two ways to create records:

1 - Manually

- Go to App Launcher > Something of the Day
- Click on Of the Day > New
- Enter your data and click Save

2 - Bulk Import

- Use the Data Import Wizard
- Object: Of the Day
- Templates and sample files available at:
mintcrm.co.uk/resources/detail/something-of-the-day/

Add Component to Lightning Page

- 1 - Go to Setup > Lightning App Builder
- 2 - Select the page to edit
- 3 - Search for **Something of the Day** in the panel
- 4 - Drag it into the layout
- 5 - Configure display options:
 - Type
 - Show Quotation Marks
 - Show Author
- 6 - Click Save

How It Works

Every day at 02:00, a scheduled job:

- 1 - Selects 60 records from each active Type
- 2 - Picks one at random to display
- 3 - Updates the previous **Last Displayed Date**
- 4 - Displays the new “Something” to your users
